

FACULTY OF EDUCATION

Pre - School Programme

Primary Programme

FACULTY OF EDUCATION

University "Ukshin Hoti" Prizren (UUHP) was founded on 09.10.2009 by Decision No. 01/87 of the Government of the Republic of Kosovo, and after an intense preparatory work with international consultants, it started operating in 2010. The headquarters of the University of Prizren is in Prizren. The university tradition begins much earlier, with the Higher Pedagogical School (HPS) in Prizren in 1962 being the first basement of this University. SHLP had become independent from the Prishtina Higher Pedagogical School which was the first higher education institution in Kosovo. The SHLP in Prizren was later transformed into the Faculty of Education-Branch in Prizren, within the University of Prishtina. The Branch of the Faculty of Education in Prizren from 2010/2011 is part of the University of Prizren. In the Elementary, Pre- school and Mathematics-Informative Program at this Faculty, instruction was also provided in Turkish and Bosnian respectively. The same tradition has continued with UHHP.

The Faculty of Education is one of the faculties in demand in the labor market due to the fact that the network of Schools in the country is expanding, as well as the generational change has created enough space for this profession to be in high demand. . Changes and developments for I-V classes based on the Kosovo Curriculum Framework raise the demand for qualified teachers, which gives this program more strength. The Faculty of Education currently has the safest job market for graduates. After completing their studies, students are ready to find work in Kosovo's primary schools. Faculty of Education University "Ukshin Hoti" Prizren is the institution that prepares teachers for primary and pre-school education in three languages of instruction, Albanian, Turkish and Bosnian.

- Program: Primary - teaching in Albanian
- Program: Pre-school - teaching in Albanian
- Program: Elementary - teaching in Turkish
- Program: Pre-school - teaching in Turkish
- Program: Primary - teaching in Bosnian
- Program: Preschool - teaching in Bosnian.

PRE – SCHOOL PROGRAMME

The pre-school program is one of the most demanded programs in the labor market, due to the fact that the network of Preschool Institutions in the country is expanding. Changes and developments based on the Kosovo Curriculum Framework raise the demand for institutionalized preschool education which also requires qualified educators. The qualification and preparation of educators to work with children in the preschool age group is a necessary requirement of the time. The Faculty of Education currently has the safest job market for graduates.

Students gain knowledge and will learn the rules of learning and learning in different learning areas, as well as become familiar with the relationships between learning processes on the one hand, and the individual and society on the other. full of the specific professional competencies required to master their fields of study and / or the discipline in which they will work as professionals (teaching, education, counseling, etc.)

Total			4 hours		30	

PRIMARY PROGRAMME

The Primary Program is one of the programs with demand in the labor market for the fact that generational change has created enough space for this profession to be highly sought in the education system. Changes and developments for grades I-V, based on the Kosovo Curriculum Framework raised the demand for qualified teachers, which makes this program stronger. The Faculty of Education currently has the safest job market for graduates.

After graduation, students are ready to find a job in primary schools in Kosovo. In Kosovo, private universities don't have legal rights to offer programs for preparing new teachers; therefore Faculty of Education in University of Prizren "Ukshin Hoti" is an adequate institution that prepares teachers for primary teaching. Graduated teachers at Faculty of Education, gain knowledge and learn about the teaching rules, and teaching different learning areas, also get acquainted with the relations between learning processes on the one hand, and individuals and society on the other. So, the graduated students of the Faculty of Education also benefit from the full spectrum of special professional competencies that are required to master their fields of study, and/or the discipline in which they will work as professionals (teaching, counseling, etc.)

LEARNING AIMS

- For implementation, promotion, organization and evaluation of educational curriculum in an effective way to the students, parents, and the other members of society – community.
- With knowledge and skills to respond to the 21st century demands;
- To highlight the variety options for studying-learning educational issues within the framework of primary education;
- To acquire skills in using different teaching methodologies through professional practices in educational institutions
- Understanding the importance of practice in educational institutions
- The credit system enables deepening the knowledge of certain areas within the elective courses within the compulsory courses of the program.
- Qualifying in using and application of the contemporary achievements in the field of the primary education as well as in the application of information technology in the development of activities with primary school students.
- Familiarity with the work in the primary school institutions during the implementation of Professional practices develops within the specific didactics.
- Familiarity with interdisciplinary contents and inclusive education
